PROJECTS REPORT

❖ “IOT Based smart city applications monitoring and control”

Due to the advancements in technologies, smart cities have been considered as a versatile parameter in order to control, monitor and operate in different fields in an efficient manner without costing much of time and manpower there by making the city smarter than before. In this project we consider five main applications for control, they are water management, traffic control, parking system, auto street light and hump illumination, and four applications for monitoring like garbage system, noise pollution, air pollution and temperature.
