Academic Projects Undertaken

AN ADVANCED VEHICLE SECURITY SYSTEM (IOT)

It is an advanced vehicle security system based on raspberry pi board. This is based on low cost hardware capabilities. The proposed system contains image processing with a real time user authentication for face identification and recognition techniques. This vehicle security system provides information in a car sensor. The proposed system would place inside the vehicle whose position is to be determined on the web page and monitored at real time. There is no comparison between the current vehicle path and already specified path into the file system of raspberry pi. If the vehicles speed goes beyond the specified value of the speed then also the warning message will be sent from system to the owner mobile.

Certifications

Core java in Rooman technologies

Python in Prathima Infotech

Software Testing in Pankaj Sir Academy
