---

## Projects

### Automated E-Ration distribution system

This system is based on GSM (Global System for Mobile) instead of ration cards, controller system verifies customer codes and details of the card. This system shows the amount details. Then customer need to enter the required materials by using keyboard, after receiving a materials controller sends msg to the government office and customer through GSM technology, this provides automatically without human interaction, saves time and there will be no cheating as there's no involve of third man in there.

## Internship - MICRON ELECTRIC SYSTEMS

Did my internship in MES Factory, MES(Micron Electric System) is electric based company, where they manufacture different types panels, Like control panels, solar panels and relay panels. They take bulk order from different companies and manufacture it according to clients requirements and distribute to them, Most of the electric grids order their control panels from MES,
