Projects

Quick Tech App (CRM Software application UX/ UI Project)

Project includes the whole process of UX

made a CRM software that could make any employees work easy and fruitful, As a UX designer, I have created this project documentation for user research. Following the UX procedure, research heuristic evolution, then persona building. Created customer journey map, user flow, task flow, and information architecture wireframe, Visual Design& UI as well, all the things I have made in Figma Software.

Awesome (Food Delivery App)

Project mainly focused on UI & Visual part

food delivery app which includes lots of facilities with healthy, safe, and delicious food delivery. I have designed this project to improve my proficiency in the Visual and UI part, I have also made the user flow in this with wireframe.

Landing page's and UI Design Portfolio

Landing Pages of various websites and mobile UI

Made many landing pages and UI screen's portfolio to enhance my skills and to be consistent with design practice

I usually prefer Adobe XD to Do Website and UI designing but for the Purpose of graphics mainly used illustrator some time use to prefer figma Software as well
