Python (Programming Languages),
Microsoft Office

Projects

E- Store, Shopping Web Application

The web application is build using ReactJS. It is an e-commerce web application in which a vendor/seller can log in to their dashboard where they can upload and manage their products. These products are posted in a JSON server, which are then served to the user using axios. User can add the products to cart and can place the order easily.

News-Monkey, News Web Application

News-Monkey is a web application with the functionality of giving you the latest news of everything. This web app is build using JavaScript Library-ReactJS, and gets the news from NewsApi which is then served to the user with the help of fetch API. User gets the latest news in just one click.

TextUtils Web Application,

Online Text-Manipulation

TextUtils is a static web application built using ReactJS. TextUtils is a word counter and a character utility, which can be used to manipulate your text in the way you want. You can remove extra spaces, and copy the manipulated text as well as convert your text from Uppercase to Lowercase and vice versa.

Snake Game Using HTML,CSS and JavaScript.

The player controls a long, thin creature, resembling a snake, which roams around on a bordered plane, picking up food (or some other item), trying to avoid hitting its own tail or the edges of the playing area.

The UI is build using HTML and CSS, While as the logic is build on JavaScript.

Fully Responsive Blog Website Using Bootstrap

The blogging project is a client-side static WebSite. Blogging, short for web logging, is an application that runs on a portal site, in which different users (and user groups) can publish and revise daily journal entries, and these entries will be made public for others to view. The whole is designed only using Bootstrap.

Declaration

I hereby declare that the details and information given above are complete and true to the best of my knowledge.
