Professional Summary

Having 1.3 years of Professional experience in IT industry, MSBI project with extensive usage of ETL tools like SQL Server Integration Services (SSIS) and SQL Server.

- I have worked in current project as BI Developer in Designing ETL Packages and complex queries in development and implementation stages of the Project according to client requirements.
- Used Control Flow Tasks like For Loop Container, For Each Loop Container, Sequential Container, Execute SQL Task, FTP Task and Data Flow Task in Designing packages. Proven proficiency at Data Transformations like Lookup, Derived Column, Conditional Split, sort, data Conversion, Union All, Merge Join, S c d and OLEDB Command to load data into SQL Server destination.
- Experience in providing Logging, Error Handling by using Event Handlers for SSIS Packages.
- Hands on experience on Data Analysis and in designing robust SSIS (ETL) packages for importing/exporting data from heterogeneous sources like flat files, Excel and SQL SERVER by applying complex business requirements.
- Good communication, inter-personnel skills and good team player.
- Good understanding of Microsoft SQL Server
- Develop, implement and optimize stored procedures and functions using T-SQL.
- Worked joins and sub-queries to simplify complex queries involving multiple tables to be used in production.
-

Professional Experience:

- I am working with the Capella Systems Pvt Ltd from November 2020 to till date.

Technical Skills:

Operating Systems	Windows 10
Databases	SQL Server 2014
ETL	SSIS

Educational Qualification:

- Bachelor Of Pharmacy(B pharm) in Chaitanya College Of Pharmacy ,Markapur - 2020

Project : GMAC Insurance Management Systems

Client : GMAC Insurance Management Systems
Environment : SQL Server, SSIS
Role : Developer
Duration : November 2020 to till date.

Project Description:

GMAC is the largest general insurance group (based on the amount of personal and commercial insurance premiums) and one of the largest banks (Ally GMAC Bank). GMAC insurance specializes in RV insurance, VEHICLE insurance, HOME insurance and has leading superannuation, investment and asset management business.

We receive the data in the form of xml, excel and flat files which need to be loaded into the Database schemas. For loading data into Data Base we are designing SSIS Packages and for data representation we are developing by using SSRS.

Roles & Responsibilities:

- Creating staging database for temporary processing of data, consolidating data and Loading database using Integration services.
- Creating Packages on SSIS by using different data Transformations like **Derived Column, Lookup, Conditional Split, Merge Join, Sort and Execute SQL Task** to load data into Database.
- Importing Source/Target tables from the respective databases by using Execute SQL Task using Control Tasks in SQL Server 2014 Integration services.
- Involved in Scheduling Jobs to execute SSIS packages.
