Projects Details :**Project Title : Hospital Management System.**

Description : The core objective of the project is that Hospitals can eliminate use of manual system for the management and maintenance of critical information. A significant part of the operation of any hospital involves the acquisition, management and timely retrieval of great volumes of information. This information typically involves patient personal information and medical history, staff information, room and ward scheduling, staff scheduling, operating theater scheduling and various facilities ,waiting lists. All of this information must be managed in an efficient and cost wise fashion so that an institution's resources may be effectively utilized and this project will automate the management of the hospital making it more efficient and error free. It aims at standardizing data, consolidating data ensuring data integrity and reducing inconsistencies.
