

Kohinoor Nath

Product Designer

“Every design in my opinion, must have a purpose, great design is not about aesthetically pleasing, but also communicates obvious function. It is a timeless masterpiece that influences the way people use your product.

Hello,

I am a Product Designer at **FlytBase**, Pune having a **1.7 year** industry experience of designing Enterprise web and mobile-based applications. Currently worked on **50+ features** and **4 complete** revamped interface of the product.

PROJECTS

FEB-MAR
2021

Drone Delivery System

FlytZip is the only **cloud-based** software platform for managing all aspects of **drone delivery**. With dedicated web **dashboards for operators, stores, and recipients**, FlytNow delivery system enables users to monitor delivery operations in real time.

Responsibility

Design an experience for the Store-front managers who can create request delivery, the centralized drone delivery operator can plan, approve and launch the drone, while all the stakeholders including the recipient can track the live location of the drone and see the video feed from the onboard camera.

AUG-OCT
2021

Drone in a Box(DiaB) integration

With the help of **Drone in a Box** integration with **FlytNow** application Conduct fully automated and continuous drone operations by leveraging the docking station and battery-swapping station with low-cost off-the-shelf DJI drones.

Responsibility

Design the architecture and the experience of a user who is going to use this setup into his dashboard. My main goal was for the user to be able to operate a drone operation in a safe and reliable manner with the Drone in a Box(DiaB) setup.
