PROJECT

Title : Model Driven Development Of Application Using Cloud Of Things

Duration: 6 Months

Description : This project is based on Cloud Computing where we can create an Android Application without using code in which the codes already stored in Cloud. This is a user friendly where user can create an own Android Application and customize in their own way. After creating to access the application we have to provide our phone number to get otp and that otp is used to login in to the which you created for the first time. SQL Database is used to store the information like number an otp. SQL is connected to the server so that we can receive otp.
