- Communication Skills
- Quick Learner

HOBBIES:

- Volunteering and community involvement
- Learning languages
- Travel
- Listening to Music
- Sports

PROJECT:

Project Title : Analysis of Health Records and Disease Identification Using Big data Technique.

Description : With the enormous increase in population and the onset of diseases, there has been a necessity for a system that can predict the disease correctly without any bias by taking inputs from the user. We propose efficient analysis model and disease identification for total health record analysis using big data.

Role : Team Member
