github.com/ram-nullbytess

Full Stack Engineer with Hands-on experience in writing the logic for both client-side, server-side web applications by using Node.js, Express, MongoDB, Web-Sockets. I built applications like Faker, Sudoku, Grid game, Chrome Extension, Hacker News, Imgur, Ecommerce, IMDB, Instagram stories, Gamers-chat-socket.io, Job-Heist!. I am familiar to work with the front-end by using React, Angular and fascinated to learn new technologies, frameworks, Libraries.

## WORK/EDUCATION

### Capgemini Software Engineer

03/2021 - Present

### Product Engineering BOOTCAMP

06/2020 - 12/2020

Course

- A 14-week product development program where I built products using MERN Stack mainly focusing on Integrating the Front-end & Back-end of the applications. Also developed self-learning techniques that let me adapt easily to newer technologies.

### Bachelor of Engineering R. L. Jalappa Institute of Technology

08/2016 - 08/2020

74%

Course

- Electronics and Communications Engineering

## PROJECTS

### Sol Traders Club NFT Solana Blockchain

- Built the Solana NFT Minting Web App by using Metaplex and Candy Machine on Solana Blockchain. Users of this application will be able to connect to Different Crypto wallets like Phantom and Mint a random NFT. After a successful Mint, the creator of an art piece will be credited the SOL Mentioned in the metadata.

### Job-Heist!

- Job-Heist! is a web app for students and recruiters. Developed the Login/signup authentication using a JWT token assignment. Worked on the middlewares, so that only authenticated users can access the information. Built the Resume model to help the students. Deployed the entire React front-end in Netlify. The project is live Hyperlinks are attached right after the project name.

### Imgur

- Imgur is an image hosting and sharing site, where Created the React components to render images on the home page. Incorporated the materialistic loading UI. Used the Unsplash API and Axios which is a promise based fetch for loading the page with copyrights free images for clients. Created an upload modal such that the clients can upload an image securely to the Google Firestore.

### E-commerce

- Worked on shopping cart where Deployed backend to cloud server Heroku. Created the Schema, routes to perform CRUD operations to the products. Worked on the UI functionality which adds items to the user cart. Created relations between the tables such as brands, tags, etc.
