- TypeScript

Projects

Kotak Mahindra Early Warning System(EWS).

EWS project imperative for banks to reconsider their credit risk monitoring practices and replace the manual process with an AI-powered Early Warning System(EWS) that helps in identifying risks at an infant stage. A Cadenz-powered EWS can help bank in not just effective credit risk monitoring but will also serve the related purposes of fraud control and regulatory compliance.

BPCL Portals

Designed User Interfaces and Integrated responsive API's for Admin, Vendor and Analytics portal of BPCL.

Restaurant management system

To help the restaurant administrator to manage restaurant management and for customer make their ordering and reservation. Other than that ,the project is to upgrade the manual system and make the business easily to access and systematic Nowadays many restaurants manage their business by manual especially take customer ordering

Achievements & Awards

Smart India Hackathon 2019 - Our team got selected to implement the Idea of mercury detection system in sea food.

Devloped highly responsive User Interfaces.

Activities

Participated in various Environmental Club.

Volunteer in event managements as event launcher.
