PROJECTS

MANAGEMENT OF STUDENT

It is a mini software developed in PHP for the management of student.
The command includes various options for the students like viewing their profile, enrolling them in various courses, seeking admissions ,etc.

PREVENT PRESERVE PROMOTE

This project is a healthcare system that helps to find and to know a number of home remedies and instant relieving tips for the most common diseases that could be provided to a person in case of emergency.

For front-end - HTML and CSS are used.
For back-end - HDFS and python is used.
We used Hive and Pycharm tools for this project.
