Obtaining a position where I can utilize my skills and knowledge in a challenging and creative work environment to enhance expertise in application design by offering for continuous learning, opportunity, and growth.

Experience Summary:

- I have **2.5** years of experience at **INFOSYS** with active involvement in web-based applications using Drupal, Bootstrap, MySQL, PHP, JavaScript, HTML5, CSS, jQuery.
- Proven Capability in handling the change requests in the projects individually and coordinating with a team.
- Involved in Coding, Code Reviews, Unit testing, Upgrading the site from Drupal 8 to 9 and deployment activities.
- Possess good analytical and problem-solving skills, capable of learning new technologies quickly.

Project Details:

Client: Public Works and Government Services Canada

Role: Drupal Developer

Project Description: The project aimed at developing CanadaBuys application which is a new suite of online procurement services launched by Public Services and Procurement Canada (PSPC). It is a multilingual site developed in English and French. We have developed various webpages, Functionalities, and tendering services to bid on tender opportunities with the Government of Canada using Drupal 8.

Roles and Responsibilities:

- Developed the multi-step Webforms for creating manual tendering services, Created twig templates for webform preview pages
- Implemented required custom functionalities for the fields in webforms using JavaScript and jQuery.
- Involved in custom theming to create scss files for the visual look of the websites as per the requirement.
- Created various content types and involved in coding to save the to node.
- Involved in creating custom modules for various required functionalities.
- Created custom blocks and configured block display for webpages and developed block specific twig files.
- Created views for displaying the lists of content in different formats.

- Worked on various modules Views, Easybreadcrumb and translation of content.
- As a part of Change request Created new taxonomies, feed types and imported CSV through feeds. Configured these fields to various entities and managed the UI through CSS and functionality of the field through JS.
- Involved in Migrating the project from Drupal 8 to 9 version.
- Actively involved in communications with the Testing team to provide clarifications and inputs during testing phase and defect fixing.
- **Currently I am working on the Lumen framework to create APIs as per the OCDS format.**
