PROJECT

Title	Automated and Secure Monitoring System for Smart Home Application Using Internet of Things (IOT)

The main objective of the project is to control the home appliances effectively using a smartphone. This project is based on the Raspberry pi, Python, Android platform and Java.The user can send commands using an android application running on an android phone/tablet.This is a working prototype having integrated key features such as face recognition, control home appliances and monitoring water tank level. Using this as a reference, it can be further expanded to integrate many other features into a single raspberry pi unit. This project provides a secure and user-friendly system.
