PROJECTS

Virtual Voice Assistant:

Here I created a voice assistant which was able to hear the voice and do the required tasks like sending emails, extract a wikipedia article, tell current time. Here I used speech recognition, text to speech, beautiful-soup libraries of python
Github Link: https://github.com/akashmalvi/Python-projects.git

Blogging Web application using Django:

Here I built a simple blogging web application using Django framework where user can post an article and others can comment on it. Also it has the features like, editing, deleting etc.
Github Link : https://github.com/akashmalvi/my-django-projects.git

E-commerce application:

Here I created a E-commerce platform, where a user can shop for various Products and add them to cart and can place the order as well.
